Helps to keep Food Safe & Fresh for Longer

Provides Protection against Bacteria & Microbes

PROTECTOR®
Health & Hygiene

Protector® Cling Wrap keeps the food safe, fresh and healthy for longer and reduces the chances of cross-contamination

Kills Bacteria & Microbes upon contact

Prevents Odour Spread

Keeps intact freshness and nutrition of the food

Protector® Cling Wrap not only forms a barrier against external environment but also kills the harmful bacteria & microbes. Furthermore, it prevents cross-contamination when food items are kept in proximity. A study of **Food Standard Agency (FSA)** confirmed that 73% of the chicken sold in United Kingdom markets is contaminated with **Campylobacter** and 7% of the packaging found positive for **Campylobacter.**

Most of the people unknowingly risk their health by consuming the food that carries pathogenic microbes like **E.coli, Campylobacter, Salmonella & Listeria monocytogenes** etc. These bacteria can cause fatal food borne diseases such as **diarrhea, cholera, dysentery, listeriosis, salmonellosis, gastroenteritis** and **shigellosis** etc. Meat, vegetables, fruits, bakery products, processed & frozen food products are more prone to microbial contamination.

In order to ensure safe food supply and control the spread of diseases, **Health & Hygiene Ltd** has developed **Protector® Antibacterial Cling Wrap** incorporating d_2p Antibacterial Technology that provides an effective and long-lasting protection against bacterial contamination.

Its Antibacterial efficacy is 99.99% in accordance with ISO 22196, tested and proven by independent third party Laboratory. It conforms to EU 10/2011 & US 21 CFR FDA for food contact applications. **Protector® Cling Wrap** prevents bacterial contamination and minimizes the risk of food wastage by keeping the food safe, fresh & healthy.

Product specifications:

Material: Polyethylene
Thickness: 10 microns

Retail Packs:
30 cm x 30 m (approx. 100 sq. ft.) Core: 1 inch
30 cm x 60 m (approx. 200 sq. ft.) Core: 1 inch

Commercial Rolls:
30 cm x 500 m (approx. 1614 sq. ft.) Core: 3 inch

Industrial Rolls:
30 cm x 500 m (approx. 1614 sq. ft.) Core: 1.5 inch

**customized sizes can be made available*
